Software Engineering - Meeting I

Sprint 4

16 October 2023 / 10:00 pm

Attendees

Maneesh, Sarah, Fee Kim, Simardeep, Emily

Agenda

- Understand and walkthrough the sprint document
- Add weighting to issues
- Assign development tasks to the members per request.
- Figure out approach of local development
- Pick out times of availability for future sprints of the week.
- Discuss any uncertainties and touch base after tomorrow's lecture.

Notes

- Emily will do the sprint lead duties via monitoring and leading progress on the task
  - Will take up documentation, demo slides, and any support role that may be needed for developers
- Maneesh, Fee Kim, and Simardeep
  - Will be team programming on the REST API calls in the PHP script
  - Will be working on user stories, research, and test cases
- Sara
  - Will be working on the designing the database (developing a different design from our excel grouping)
  - Working on creation and population via parsing the csv files of the database
  - Will document creation, accessing, and loading data onto the database for use.

Sara will then co-ordinate with the rest of the team to ensure REST API call development handles the database smoothly.

Next Meeting's Agenda

- Clear up confusion of whether or not we want to set up local development or team program on the VM
- Clear up if any user input is involved with the current sprint (or if we are demoing without user input)
- Regroup to ensure team understands purpose and goal of the sprint.
- Resolve any open problems or discussions.
