Software Engineering - Meeting III

Sprint 4

19 October 2023 / 8:00 pm

Attendees

Maneesh, Sarah, Fee Kim, Simardeep, Emily

Agenda

- Review issues
  - Adjust weights if needed
  - Discuss progress of issues
  - Add any contributors to issues or change assignments if needed
- State completed issues
  - Expected for database creation to be completed
- Review the burn down chart and close any completed issues
- Set deadlines for pending issues

Notes

- Reminder needed to complete the pending test cases, API research, and user stories for the sprint
- Check on PHP base and connection script
- Emily
  - Working on research and user stories
  - Continuing documentation on group progress and slideshow.
  - Keeping track of burndown chart, issue progress, and weights.
- Sara
  - Had trouble with setting up local environment, but finished her assigned issues on the VM
  - Database design and creation is fully documented
  - Available to collaborate with the team on their understanding of the database

Maneesh, Fee Kim, and Simardeep are all finished with local-setup for development. All will start working on the database connection script.

- Maneesh
  - Will work on debugging the local env and transferring the database to a local environment
  - Assigned GET API call to Maneesh
- Fee Kim
  - Assigned PUT API call to Fee
- Simardeep
  - Assigned POST API call to Simardeep
- During the meeting, we create a copy of the "" table that Sara created in order to perform PUT, POST, and DELETE operations safely. This ensures no change to the original table.

Next Meeting Agenda

- Transfer the database onto the local environment
  - A connection to the database from the PHP script exists

- Ensure majority of API calls are fully set-up, functional, and tested
- Ensure documentation on the API calls is on the repository
- Resolve any problems or delays in open discussion
